

## Green Laser Flashlight OR-GJG300

### USAGE:

1. Police dazzling light source
2. On-site commanding and indicating light

### Features:

- With focusing function, which means the size of light beam and the distance of focal point can be adjusted according to practical use. Optical port protection can better protect the lens. Tail safety lock ensures safety during operation. It can be used as a dazzling device by enlarging the light spot, and can be used as a command light by narrowing the light spot.
- Adjustable focal length, continuous output of light spot
- Adjustable light spot
- Optical port protection, double insurance of the key
- Preventive device for battery reverses connection

### Specifications:

- Model no.: OR-GJG300
- Material: Aviation aluminum-alloy shell
- Exterior Surface Finishing: Anodic Oxidation Black
- Battery: 2,200mAh rechargeable lithium battery
- Wavelength: 532nm
- Power: 300mw
- Projection distance: 3,000-20,000 m (the greater the power, the farther the illuminating)
- Minimum DIA. of light spot:  $10M \leq \Phi 5mm$
- Starting time: instant start
- Working voltage: DC3.7V
- Optimum working temperature:  $-20^{\circ}C \sim +45^{\circ}C$
- Dimension: length: 200mm, cylinder:  $\Phi 28.5mm$ , head:  $\Phi 43.5mm$
- Weight: 0.4kg
